

This annual forum was co-hosted by Silicon Valley Technology Council(SVTC) + Constellar Venture, Silicon Valley Science Technology Association(SVSTA), Chinese American Semiconductor Professional Association (CASPA), and sponsored by Zhonghuan Investors' Group and Guangzhou Googol Park. The theme for this year was "The Future of Mobility with Artificial Intelligence". SVTC as the primary resource hosting the event, with the full support of SVSTA and CASPA, has planned, organized, promoted, and implemented the whole process, which has achieved complete success. We are greatly encouraged by many good comments from our guests.

The semiconductor analyst Jim Handy presented AI and autonomous cars' impact on computing and storage future demand on the semiconductor.

The Forum has invited several keynote speakers from the fields of AI and autonomous driving. They brought pioneers insights to our audience, from the big picture of the semiconductor business, autonomous driving technology, AI big data, to information display and operator experience, all presentation provided AI technology development pictures from different angles.

Dr. Tony Han, Chief Scientist of Jingchi Technology, had shared their autonomous vehicle development and showed a video of their driverless vehicle on the road.

Dr. Peking U of Himax Display envisioned applying their new technology to inside-vehicle display.

Among the attendees, we have a manufacturer of the autonomous vehicle, investors, enterprise consultants. More than 300 in the audience listened and enjoyed the speeches. From 2-5pm, 7 speakers presented their in-depth knowledge of the forum theme. The managing director of SVTC, Mr. Ming Lin, wishes everybody walks away with useful information from these outstanding speakers. He said we will continue to do this next year, to bring the most advanced science and technology to all who are interested!

Finally, SVTC wishes to give thanks to the sponsor of this event, Guangzhou Zhonghuan Investors' Group, and Guangzhou Googol Park. It is their trust and support that give SVTC the opportunity. Thanks also go to the full support of SVSTA and CASPA. They have helped to invite the outstanding Silicon Valley AI and autonomous industry leaders, so the event contents were so much more remarkable. Of course, we must give our praises to all the volunteers. It is your support that made this forum successful.

From stage to behind the scenes, thank you all for your great support and assistance! We hope to see you on the next year's forum!!
